**Subject:** genetically engineered foods.  
**Sensitivity:** Personal

Dear Sirs

I am an attorney living in Savannah Georgia, and a mother of 3 small boys. I have read quite a bit about genetically engineered foods, and growth hormones given to dairy cows. I do my best to buy organic foods for our family, but most people of the world do not have access to organic foods, or cannot afford them.

Please, please think about our children when you are making decisions about our food supply. They are counting on us to do the right thing.

Carolyn Bamberger
